

Serialization is not just about generating unique serial number, but the use made out of it .

The CSP group is fully involved in **serialization**, faithful to its mission Of offering a wider range of services to its clients. With several years of experience and numerous contacts In the pharmaceutical industry, **Laure Brenas, Chairwoman**, wishes to share this article with you:

strive towards highest quality rate, or purpose aggregation on demand as an additional service.

By implementing a complete data flow through the entire supply chain, **serialization could also embody a first step for laboratories towards their digital transformation**. Given that the relation to patient is evolving – due to a more connected patient that proactively manages his own health – it provides milestones to CRM and new uses deployment throughout the health chain.

For decades, CSP used to offer a wide range of high value-added logistical services to meet all the needs of its clients. CSP is known for mastering the pharmaceutical logistic circuits and using tools with the latest standards of technology and regulatory. That is why CSP appears as the perfect partner for laboratories to address the serialization issue.

Serialization is not just about generating unique serial numbers. It also requires maintaining those identifications to provide visibility and full traceability within the long and complex supply chain. To be a key weapon, this system should be implement close together with a secured and unfalsifiable technology.

The CSP group – through Digital CSP – purposes solutions for every serialization levels: marking small batches products, but also an innovative purpose for levels 4 & 5 (an IT architecture to centralize serialization numbers and move them to EMVS).

So, serialization appears as a global supply chain project and data should move through the entire supply chain in a reliable and secured way.

Deploying serialization leads to **develop the necessary data infrastructure**. This one could also be used to improve the logistics efficiency:
